

Spheresculpt therapy machine

Body Contouring
Lymphatic Drainage
Skin Tightening
Pain Relief
Vascular Action
Muscle Toning

Principles of treatment

Spheresculpt Therapy produces a vibration and pressure combination that performs in effect gives the skin a 'workout'. This generates the drainage of fluids, the re-compacting of skin tissues, the removal of the "orange peel" effect from under the skin's surface. It also helps microcirculation which can help reduce inflammation and improve in muscle tone.

It helps improve vascularisation which in turn supports the production of collagen and elastin. It increases oxygen delivery to help nourish and brighten tissue from within. It tones the muscles helping reduce eliminate the appearance of expression wrinkles, combat tissue sagging, and generally lift the complexion and facial structure.

Range of treatment

Double Chin

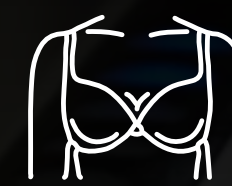

Axilla

Inner Thighs

Flanks

Bra Line

Abdomen

Love Handles

Below Buttocks

Outer Thighs

Body treatment

/ Areas of application /

Cellulite	Contracted Muscles	Swollen legs	Buttocks	Abdominal fat	Post-pregnancy treatment
Orange Peel skin	Oedema	Arms	Ankles	Breast tightening	

- REDUCES LYMPHATIC FLUID RETENTION
