HIFEM Technology

Using High Intensity Focused Electro-Magnetic (HIFEM) technology, Musculpting Pro induces supramaximal muscle contractions not achievable through exercise (or voluntary contractions).

During normal voluntary muscle contractions the muscle fibers relax between each nervous stimulus. Musculpting Pro generates impulses at such a rapid frequency that it doesn't allow such a relaxation phase. Supramaximal contractions cause an enhanced adrenaline release, which triggers an intensive lipolysis response in fat cells. When exposed to the supramaximal contractions, the muscle tissue is forced to adapt, responding with a deep remodeling of its inner structure that results in muscle building and fat burning.

Mechanism of muscle contraction

Nerve impulses set off a biochemical reaction that causes myosin to stick to actin

Musculpting Pro induces very strong (supramaximal) muscle contractions, not achievable through workout. When exposed to these strong contractions, the muscle tissue is forced to adapt to such extreme condition. The muscle starts remodelling its inner structure by multiplication of fibers and their growth. The HIFEM uses a specific range of frequencies that does not allow muscle relaxation between two consecutive stimulations. The muscle is forced to remain in contracted state for multiple seconds. When repeatedly exposed to these high load conditions the muscle tissue is stressed and is forced to adapt. Recent studies reported that on average 15%- 16% increase in abdominal muscle thickness was observed in treated patients one to two months after HIFEM treatments.

After Childbirth

Build abdominal
muscles Perfect Firm
abs and V line abs

The Musculpting Pro works on the abdomen area contracting and tightening the muscles to both burn fat and sculpt the area. This treatment can help you improve the muscle definition that you are already seeing from your fitness routine. It is also ideal for addressing that stubborn inch of fat on your stomach that just won't go away.

musculpting^{Pro}

for the abdomen

Musculpting Pro works on the buttocks as well, using the same supramaximal muscle contractions as with the abdomen area. Many patients opt to try this treatment in place of an invasive Brazilian butt lift. HIFEM technology delivers the world's first noninvasive butt lift procedure. This treatment can give you the curvature, tone, and lift that you desire. It is an alternative to the Brazilian Booty Lift procedure and provides a defined shape instead of adding excess fat to the area.

musculpting^{Pro}

for the buttock

Dedicated multi-directional handle fixed arm

Multi-directional fixed support arm can be adjusted freely at any angle of 360°

The multi-directional fixed arm greatly facilitates the treatment of various parts of the body, and perfectly solves the problem that the handles of the shoulders, handles, shoulder blades and other parts are not easy to fix. Users can easily enjoy the treatment of muscle gain and fat reduction in various parts of the body.

New Curved Applicator Cintours Arms, Thighs & Calves

The Curved handle is sure to be welcomed by the thousands of men and women who want a little help with contouring the arms with stronger, more defined triceps and biceps and individuals who want to tone, lift, and sculpt the upper regions of their legs.

Reduction Of Fat

4 cm (1.5 inches) loss in waistline circumference

11% reduction in abdominal muscle separation (called diastasis recti)

5 x increase in fat metabolism (apoptotic index increased from 19% to 92% after treatment)

80% patients with visible lifting effect of buttocks

96% patient satisfaction

FAQ

Q A candidate?

A Anybody

Q A downtime?

A Not at all

Q How long will it last?

A Extremely long

Q How often?

A 2~3 times a week

Q Additional supplies?

A No consummables

Q How long can I use it?

A No limit

Q How long?

A 30 minutes per session

Q How many time?

A 6~8 treatment recommended

Q Manual program?

A Easy & Effective manual mode
